2018003096	Emergency Flow Sheet	Event that occurred:	Medical Emergency called. Pt found hunched over his bed, on his knees, facing toward the wall. Pt unresponsive. Writer and KH, LPN lowered pt to the floor. 911 called immediately by security. LAC and RAC cut wide open (both the size of a quarter), deep enough that his antecubus appeared hollow inside. Deep laceration also noted to RFA. All lacerations covered w/ gauze and pressure applied. Large pools of blood in several areas of cell and large amount of blood on several walls of cell. Large clots of blood and what appeared to be human tendons/arteries strewn about cell. No breathing observed. Unable to auscultate heart sounds or feel palpable pulse. Chest compressions initiated by Lt Bahlaj at approx 1105 and continued CPR w/ KH, LPN. AED applied at approx 1110 but would not advise shocks. CPR continued and AED kept attempting to read pt. 911 arrived at approx 1120 and took over CPR.	Grous, Samantha	08-25-2018 11:47 am
